

ATEK-MARINE

Non-dispersible underwater concrete admixture

ATEK-MARINE is a non-dispersible underwater admixture used in making concrete with high-viscosity that is non-dispersible. With improved viscosity and resistance to separation of ingredients, adequate flowing is maintained until applied and hardened without dispersing underwater.

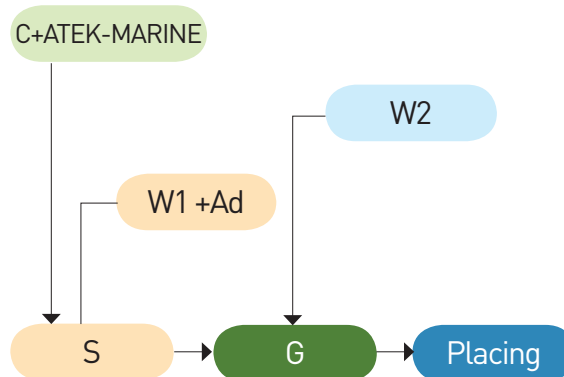

Normal Mixing

C : Cement
S : Sand
G : Gravel
U : ATEK-MARINE

W : Water (W1, W2 : deride into 2 times)
Ad : ATEK-PC, 211

Triple Mixing

Cast-in-place concrete
